If 'No' move onto Part 2of this form

PART3: Screening	Further Guidance	Yes	No
Question			
Does your research	This may include identifiable data that are not in the public domain		
involve secondary dat	where consent was not provided for useof data beyond the purpose	•	
not covered by Par2?	for which it was originally collected.		
Will your research involve human participants? The definition of human participants alsoncludes yourself, e.g. autoethnography	This includes any procedures or activit(excluding questionnaires, surveys, interviews, and focus groups) hoolving living persons and the use of data or tissue obtained from livipg rsons, whether directly or indirectly. This include autoethnography or data regarding other people obtained from databases, public bsites, and social mediatc. This isunless the data are held in publicly available collections from archaeological sites and curated explicitly for the purposes of research		
	This may also include the use of data and tissue obtained from deceased individuals you are working exclusively with cell lines an not primary cellsor tissues you will not normally need ethical review. Please seek advice from thics@dmu.ac.uk		

Does your project	External review will be required for research involving NHS This			
require external ethical includes research within the NHS involvipatients, staff data,				
review?	facilities or externally sourced workersroviding services under			
	contract with care services or commissioners.			
	Further examples include:			
	x UK Social Care organisations or service users (includes contractors providing services under contract with care services or commissioners).			
	x Clinical Trials of Investigational Medicinal Products, Medical Devices or Gene Therapy Medicinal Products.			
	x The prison service, offenders, participants on probation. Any member of the research team or participants who are members of the Armed Forces or their entitled dependents.			
	x The administration of ionising radiatio All of which is scope of the Ionising radiation medical exposure MER 2017 regulations			
	x Participants aged 16 or over who may lack capacity to give fully informed consent or who may lossapacity to give fully informed consent during the study.			
	x Research regulated under the Animals (Scientific Procedures) Act 1986 (ASPA).			
	x Research that may be regulated under the Human Fertility & Embryology Authority			
	Please seek advice from hics@dmu.ac.ubefore proceeding any further if your research involves any of the above.			
Does your research	May include visiting areas of potential or actual known violence or			
require you or your	conflict, as defied by the Foreign and Commonwealth Officeavel			
participants to travel to				
dangerous or restricte				
locations?	This may also include travel within the UK to environments that are			
	potentially risky			
Does your research	An exampleof an unfamiliar nonpublic spaces might beparticipants			
involve you working	home.Refer to theDMU Lone Worker polictor more information			
alone in nonpublic,				
unfamiliar spaces?				

If 'Yes' to any of the Part 3 questionsan ethics application IS required. Please submit your application using the Wotkibe ethics portal (https://dmu.worktribe.com/).

If 'No' to all
